

Creating a User Form

The screenshot shows an Excel spreadsheet with a 'Press Here' button. A user form titled 'Employee Data' is displayed over the spreadsheet. The form has three input fields: 'Employee ID', 'Employee Name', and 'Employee C.No'. Below the input fields are two buttons: 'Insert' and 'Cancel'.

Create a User form which has the following

- 1. 4 Input options**
- 2. 2 Control buttons**
- 3. 1 Macro enabled button to bring the User Form**

Note: You can use any parameter to have your Input

Sample Code for your reference

```
erow = Sheets("sheet1").Range("a" & Rows.Count).End(xlUp).Row
```

```
Range("a" & erow + 1) = TextBox1.Value
```

```
Range("b" & erow + 1) = TextBox2.Value
```

```
Range("c" & erow + 1) = TextBox3.Value
```

```
TextBox1.Value = ""
```

```
TextBox2.Value = ""
```

```
TextBox3.Value = ""
```

Module Code for Macros

```
Sub Enter_Employee_Details()
```

```
Employee_Data_Form.Show
```

```
End Sub
```
